- Feline Distemper, Rhinotracheitis, Calicivirus combo vaccine.
- Intestinal Parasite Exam (Stool sample check)
- Start Revolution for Flea/ Tick prevention

Second Kitten Visit: 3-4 WEEKS AFTER FIRST KITTEN VISIT.

- Physical Exam
- Feline Distemper, Rhinotracheitis, Calicivirus combo vaccine.
- Feline Leukemia Vaccine #1
- Intestinal Parasite Exam (stool sample check)
- Continue Revolution

Third Kitten Visit: 12 WEEKS OF AGE OR OLDER

- Physical Exam
- Rabies 1yr
- Feline Distemper, Rhinotracheitis, Calicivirus combo vaccine 1yr
- Feline Leukemia Vaccine 1yr
- Continue Revolution

Please return promptly and schedule appointments appropriately for vaccine updates, as your kitten is not fully protected against these diseases until the vaccine series are completed. Try to keep your kitten isolated from other cats until the vaccine series are completed.

- **We recommend Spaying/Neutering your pet at around 6 months of age.**
- **Please bring a fresh stool sample to your visits for us to examine for intestinal parasites.**
- **Your cat needs to be kept on Flea and Tick prevention year round.**
- **If your cat is outdoors, retest for Feline Leukemia/ FIV yearly and keep updated on Feline Leukemia Vaccine.**
